From dewy lanes at morning
the grapes sweet odors rise,
At noon the roads all flutter
with yellow butterflies -
By all these lovely tokens
September days are here,
with summer's best of weather
and autumn's best of cheer.

Heart Answers

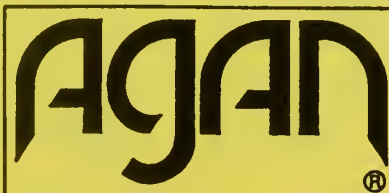

WHAT IS A HEART ATTACK?

A heart attack is the death of a portion of heart muscle that may result in disability or death, depending on how much of the heart is damaged. It occurs when an obstruction in one of the coronary arteries prevents the blood from supplying oxygen to the heart muscle. Heart attack symptoms may include chest pain, nausea and shortness of breath. The risk of heart attack can be reduced by treating high blood pressure, avoiding cigarette smoking, observing a low cholesterol diet and maintaining normal body weight.
